

## our **commitment**

Dajcor Aluminum Ltd is a value added extrusion supplier, focused and driven by the simple edict 'Take Care of the Customer'. With extrusion, fabrication and anodizing capabilities all under one roof at our 190,000 sq ft Chatham facility, Dajcor is committed to delivering quality extruded components, on time, at a competitive price – your 'One Stop' extrusion supplier! Dajcor Aluminum is committed to manufacturing excellence, quality and the highest standard of customer satisfaction. This commitment will be achieved through continuous improvement of business practices, innovation, participative management and employee involvement.

## quick **facts**

**PLANT:** 190,000 SQ.FT. ON 20 ACRES

**CAPACITY:** 10,000,000 POUNDS PER YEAR

**PRESSES:** PRESSES 7" 1650 TON CCD, 5" 750 TON PRESS

**DESIGN:** DESIGN CAD FOR LAYOUT AND DIE PRINTS, EXTRUSIONS DESIGN, FABRICATION AND ASSEMBLY

**ANODIZE:** ETCH AND CLEAR SATIN FINISHES INCLUDING ELECTROLYTIC COLOUR UP TO 28"-0".

CHEMICALLY BRIGHT FINISHES IN A WIDE RANGE OF COLOURS UP TO 12'6" LENGTHS.

DAJCOR EXTRUDES PRIMARILY 6000 SERIES ALLOYS, 6063, 6463, 6061, 6005

## plant **capabilities**

### EXTRUSION

- Dajcor provides quality extruded parts at competitive prices and offers quick turnaround times.
- Our design staff and skilled workforce excel in designing and manufacturing the most complex of extruded products.
- Our Dajcor team will help reduce costs in post extrusion fabrication and machining, by incorporating features that result in the more efficient manufacturing of your components.
- Dajcor takes responsibility for your parts from conception through extrusion, fabrication, and anodizing, to shipment to your facility. By providing all these services under one roof, Dajcor eliminates the problems experienced from multiple sub contractors within the supply chain.

### FABRICATION

- Dajcor has full in-house fabrication capability, avoiding the costly delays and additional material handling required by subcontracted fabrication services.
- Numerically controlled machining centers provide state-of-the-art capability and capacity for a wide range of precision production machining. Complete fabrication services include special tolerance cutting, mitring, notching, piercing, forming, bending, mechanical assembly and welding.

### ANODIZING

- Dajcor offers etch and clear satin finishes, including electrolytic colour anodizing, for lengths up to 28'. Many of our anodize finishes are approved to various automotive and military anodize standards.
- Dajcor also offers chemically bright anodizing in a wide range of standard and specialty colours, processed with our state of the art automated anodize line, handling lengths up to 12'6".
- Dajcor provides mechanical finishes such as buffing, brushing and deburring to complement our chemical finishing capabilities.
